

## Revision of Corporate Philosophy and Establishment of Sustainability Policy

We are pleased to announce that we have recently revised our corporate philosophy and established a new sustainability policy.

### [Revision of Corporate Philosophy]

16 years have passed since we formulated the current Corporate Philosophy (Management Philosophy, Management Policy, Keystones). During that time, our corporate group and the external environment surrounding our corporate group have changed significantly. Looking to the future, we have revised our corporate philosophy so that we can respond to a new era and the external environment at this timing when the pace of market growth is accelerating.

### [Establishment of Sustainability Policy]

There is increasing global attention on the importance of developing a sustainable future. Companies are now expected to engage in sustainable business activities and to meet the societal expectations and demands placed upon the company through their businesses.

In response to this trend, we have established a sustainability policy.
